Hungary Air Intelligence Bottom Line

What changed → why it matters → what it means for Hungary / MH / NATO → what to watch

BOTTOM LINE

Deterministic from judgements

None of the 7 material air-power developments this period is of HIGH relevance to Hungary; the most relevant are rated MEDIUM. France to begin Rafale pilot training for Ukraine from November 2026 — pilot training commencement is a necessary precondition for any future Rafale operational capability in the Ukrainian Air Force. [XS-01] Poland FA-50 first 12 aircraft reach full operational capability; assume QRA duties (KJ-05 judgement, moderate confidence, immediate). [KJ-05] Ethiopia first delivery of Su-35SE fighters from Russia — 2 of 12 received (KJ-02 judgement, moderate confidence, <12 months). [KJ-02] In Hungary's immediate and near region, material change was assessed for Poland, Ukraine; no material change was identified for Russia, Romania, Czechia, Lithuania. [D-06,D-07] Collection gaps remain for Serbia, Belarus, Bosnia and Herzegovina, Austria, Slovakia: absence of reporting there is not evidence of inactivity.

REGIONAL AIR PICTURE

HIGH MEDIUM LOW collection gap Hungary

Colour = Hungary relevance of the material development (not air-power significance). Dashed outline = collection gap. Hotspots only — no hotspot means no material change identified, not no activity.
